STEINS'S DISCOVERY ATTRACTS INTEREST.

Oculists of Paris Inclined to Be Skeptical as to the Value of Invention to Help the Blind.

aonths ago.

Professor Steins's experiments are still go-

Professor Steins's experiments are still going on, and, according to Mr. Finol, selitor of La Revue, formerly of La Revue des Revues, which gave the first news of what had been accomplished, those who have seen the experiments believe that Professor Steins has accomplished a great deal and will do much more.

Nevertheless, there are some well-known oculists in Paris who are inclined to be somewhat skeptical as to the value of the experiment in which Doctor Care took pari, and one of these is Doctor George J. Ituil. "I have never heard of Professor Steins or of Doctor Care," said Doctor Buil, "and after reading the substance of what the latter says I am convinced there is nothing at all in it.

"It is easy to convey an impression of light to the brain if a certain kind of in-

ter says I am convinced there is nothing at all in it.

"It is easy to convey an impression of light to the brain if a certain kind of instrument is applied to the forehead. This is aiready known. If a light is placed on the temple it is more than probable that the person experimented with would have the image of the lamp in his mind and possibly under the influence of the suggestion he might think he could count figures and even objects in a room.

"He might even reach a point where he was beginning to feel that he could see everything. It is very unfortunate that the experiment with Doctor Caze should have been interrupted at so critical a moment."

BOLLMAN'S

NEW ADDRESS. 1120 & 1122 OLIVE ST.

(Leave car at 12th st.)

DEATHS.

CANDY-On Saturday, March 7, 1963, at 4:29 o clock a. m. our beloved mother. Mrs. Asenath Candy, at the age of 75 years.

Puneral will take place from her son's residence No. 4229 Morgan street, on Monday, March 9, at 2 yelench p. m. to Bellefontaine Cemetery, bau Chaire, Wis. and Great Falls, Mont., pages places. papers please cuty.

CONIGN-Entered into rest, Sunday, March 2, 1921, 21 b o'clock a. m., at his home near Manchester, Mo. Patrick Conlen, beloved husband and father, in the seventy-third year of his age. Funeral services at 10 a. m. Tuesday, March 10, at 81, Joseph's Church; thence to 81, Peter's Cemetery, Ruse Bill.

DAWSON-At the residence, No. this Margaretta avenue, Mary Dawson, daughter of the late William and Isabella Dawson.
Funeral from the residence Wednesday, March 11, 1903, at 2:26 o'clock p. m.

DELANY—On Sunday March 8, 199, at 8,00 o'clock n. m., Patrick helowed husband of Britheet and father of William Delany and Mrs. George Mayers.
The funeral will take place Tuesday, March 10, at 1,20 o'clock p. m., from funeral rooms of culten & Kelly, No. 27th Case avenue, to St. Lawrence O'Toole's Church, thence to Calvary Cometery. Friends are invited to attend.

DOHR-Johanna E., wife of the late Frederick Doir of Kirkwood, Mo., aged 76 years, at the residence of her daughter, Mrs. 12 J. Lloyd, No. 307A Ruiger street. Funeral services at 9:30 a. m., Monday. In-terment in Oak Hill Cemetery, Kirkwood, via Missouri Pacific Ballrond.

DUNN-On Thursday, March 5, 1905, at Yossurg, Miss. George W. Dunn, beloved husband of na Dunn one Powers, and brother of Themas nd James Dunn, at the age of 45 years. Funeral will take place from family residence, o, 453, Page avenue, Monday, March 5, 1903, the name of the property of

TO DECLARE STRIKE

Three Thousand Men Will Stop Work Unless Demands Are Granted.

ASK FIVE PER CENT INCREASE.

Union Unanimously Decides on Action After Efforts for Scale Adjustment Prove Futile.

The brickmakers at their meeting yester day decided to go on a strike. The workaen will meet this morning at No. 1026 Franklin avenue to receive instructions

from the officers of the union, About three thousand men will walk out to-day, and it is thought as many more will follow before the end of the week, unless some agreement is made between the brick manufacturers and the Building Material Trades Council.

The strike of the brickmakers was agreed The strike of the brightness was accupen by a unanimous vote. Assurance has been given by other unions represented in the Building Material Trades (council that they will refuse to work unless the employers accede to the demands.

The Central Trade and Labor unions are indirectly involved in the strike, as they are affiliated with the Building Material Trades unions.

CONFERENCE OF NO AVAIL.

CONFERENCE OF NO AVAIL.

Representatives of the Hydraulic Press
Brick Company, the largest concern interested in the movements of the brickmaker.*
union, waited upon Secretary Richard Feourrey of the Building Material Trades
Council, last Saturday, but were unable to
agree on a settlement.

The men demand recognition of the inion,
change of hours and increase of wages.
They submitted a scale a week ego, declaring then that if it was not acceptable to the
employers they would go out on strike.
The wage scale was not acceptable to the
employers, and they drew one, but it was
rejected. Since then negotiations have
been pending between the union and employers, and at yesterday's meeting the
workmen decided to strike.
Included in the Brickmakers' Union are
brickmakers, bricksetters, clay miners, enginsers, firemen and transistrs.

DEMANDS OF UNION.

DEMANDS OF UNION. The wage scale submitted by the men provides for a graduated increase in all branches of the trade, averaging about 5 per cent. An eight-hour work day is also demanded.

demanded.

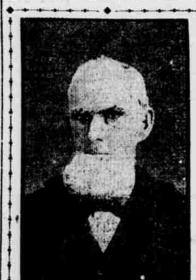

The Brickmakers' Union is one of the strongest organizations represented in the Building Material Trades' Council Other trades in the council are the cabinetmakers ornamental glassmakers, metal polishers, engineers, firemen, granifold and cement workers, corra-coula workers and marble workers.

workers. It was stated at union headquarters yes-terday that unioss the brickmakers' strike is settled before the end of the week all the other unions represented in the Build-ing Material Trades Council will go out in symuathy. sympathy.

Negotiations with the employers were conducted for the union by a committee composed of Richard Debarry, H. Mayer and W. Cook, It was as a result of their report at yesterday's meeting that the strike was ordered.

DEATH OF PIONEER RESIDENT. John McDonald Lived in St. Louis

Fifty-Six Years.

JOHN McDONALD.

Who died at the age of 76 years.

sisted by Father Ziegler and Father Mc-Donald, the latter a nephew of Mr. Mc-Donald. The interment was made in Cal-Donald. The interment was made in Calvary Cemetery.

Mr. McDonald died at his home. No. 4421
Easton avenue. He was 76 years old. For fifty-six years he was a resident of St. Louis, coming here from Ireland. He led an active business life until his health falled. His wife died many years ago. He is survived by six children, a brother, Thomas McDonald, and a sister, Mrs. Mary Masterson.

Gambling a Felony. Olympia. Wash., March 8.—The Governor has signed the bill making gambling a felony in the State of Washington.

Lowney's Packages are Full Weight.

25c. a Pound for Schotten's 1904 Roasted Coffee. Prices of all coffees much lower now than they ever were. Why buy the same grade of coffee and pay the same retail price you paid ten years ago?

You know you are not paying as much for sugar, coal oil and other necessities as you did ten years ago! Why?

Because production has been greatly increased and the cost greatly decreased. But how about coffee?

In June, 1887-No. 7 Standard Rio was quoted at 20%c. per lb. To-day the same grade is quoted at 5%c. per lb. Think of the difference! Of course this is a low-grade coffee and reduction on all grades has not been correspondingly great, but all grades have been materially reduced.

We propose to give every consumer of coffee in St. Louis the proper advantages of this decrease and, therefore, we have placed a coffee on the market which will be known as "SCHOTTEN'S 1904 ROASTED COFFEE." We positively guarantee it to be as good and in many cases better than many of the other coffees put up in cans for which you have been paying 30 to 40c. per pound. We have adopted for our 1904 coffee this motto: "A better coffee for less money."

We ask every user of coffee to buy one pound of Schotten's 1904 Roasted Coffee on trial. Do not hesitate to buy this coffee simply because the price is less than you have been paying. We repeat that this coffee is equal to, and in many cases better than, those coffees put up in tin cans for which you have been paying 30c, to 40c, per lb. This means that when you buy a package of Schotten's 1904 Roasted Coffee you will be saving from 5c. to 15c. Schotten's 1904 Roasted Coffee is put up in air-tight cartons (whole, ground or pulverized)-pound cartons only-don't forget each carton contains full pound and the price is 25c.

Our booklet, "Coffee Hints," sent free to any one on request. Write for it.

WM. SCHOTTEN & COMPANY - St. Louis

FLAMMARION CRITICISES WORLD SUPREMACY THEORY.

Recent Article by Alfred Russell Wallace, Giving to Man the Position of Supreme Importance in the Universe, Appeals to Christians, Who Have Felt Their Faith Wavering.

"MAN'S PLACE IN NATURE."

Funeral services for John McDonaid, an old resident of St. Louis, took place Thursday morning at Visitation Church and were conducted with a requiem high mass by the Reverend Father McCartney, assumed to the content of the modern theories of evolution.

His recent article on "Man's Place in Nature," wherein he gives to man the position of supreme importance in the universe and sceles to show that his earth is the center of the entire stellar system, has attracted wide attention from scientists, from clergymen and from the general public.

Especially has it appealed to Christians who felt their faith wavering by what

Especially has it appealed to Christians who felt their faith wavering by what seemed to be science's final estimate of the relative insignificance of man and of the planet on which he lives. But not all scientists nor clergymen nor laymen .

 have accepted its conclusions.
 The Republic has asked t The Republic has asked two of the leading astronomers of the world, M. ◆ Camille Flammarion of Paris, author of many fascinating essays on astrological ◆ literature, and the Reverend George M. Searle of the Paulist congregation in New ◆ York, who has been professor or assistant professor of astronomy at the Naval Academy, Harvard College and the Catholic University at Washington and is especially known as the discoverer of the asteroid Pandora, to discuss the scientific .

BY CAMILLE PLANMARION. SPECIAL BY CARLE TO THE NEW YORK HERALD AND THE ST. LOUIS REPUBLIC Paris, March 7 .- (Copyright, 1908) - First of all, let me say that Doctor Wallace, as a great naturalist and eminent savant, has my very highest esteem and sincere rever-It is, therefore, a matter of regret to me to be in such utter disagreement with his reasoning and deductions in the pres-

ent matter. From a scrutiny of his arguments it would appear that his fundamental proposition, is that our planet is at the center of the creation was our humanity.

To establish this proposition, Doctor Wallace deciares that our sun is the center of a globular star cluster, and that this star cluster occupies nearly the central position in the plane of the Milky Way. I regret to say in this he has doubly

In the first place our sun does not con stitute part of a globular star cluster. Secondly, it is not at the center of the plane of the Milky Way.

The distance of thirty stars is known to
us. The nearest, for example is Alpha
Centauri, which is forty-one trillion kilome-

tres away. The furthest is 1830, Groom-bridge, which is no less than eighty hun-dred trillion kilometres distant.

bridge, which is no less than eighty hundred trillion kilometres distant.

Now, it would be scarcely permissible for one to say that these thirty stars, scattered around at intervening distances, form a chister. Then, besides, these stars themselves cannot be considered as so many masses, they being formed of many, many thousands of other stars, such as the constellation of Hercules, which you may see any fine evening with a simple spyglass.

On the second point we are not at the center of the Milky Way, as to the exact form of which we are still in doubt.

We are in its middle plane, it is true, but appreciably distant from the center.

An inhabitant of the nearest star, such as Alpha Centaurt or 61, eygni, would have the same right as you or 1 to imagine himself at the center of the Milky Way.

Moreover, to suppose that the present limits of science correspond to the limits

Way.

Moreover, to suppose that the present limits of science correspond to the limits of the universe, it strikes me as somewhat fanciful, for as the telescope becomes stronger and the photographic plate more sensitive, man can penetrate further and still futrher into the abyss of space.

IOWA FARMERS ARE MOVING TO NEW LOCATIONS AT MACON

They Claim That More Fertile Land Can Be Obtained in Missourt.

REPUBLIC SPECIAL. Macon, Mo., March 7.-The invesion of Northern Missouri by the land purchasers from Iowa is now on. The trades were con summated last summer and fall, posses sion to be given between the 1st and 10th of March. As a consequence, every train from the north is bringing colonies of Mis-

from the north is bringing colonies of Missouri's new citizens.

A special car from Taylor and Story counties, Iowa, brought to Macon this week fifteen families. The real estate concern that was instrumental in getting them here had these people and another consignment of twenty families on its hands this week. To accommodate them it had to charter the Tremont Hotel and the Miller House.

The people coming from lown are very desirable. They are thoroughly experienced in land development. Some bring with them methods that may be instructive to Missourians.

Doctor Wallace reasons much as as-trologers of the Fourteenth Century did, be-lieving they had attained the limit of as-tronomical discovery.

As a matter of fact, our conquests in this espect are as nothing compared with the mmensity of nature.

As for the deduction that because we live

As for the deduction that because we live so well on earth our planet is the only habitable one, and that life is possible on the terfestrial globe alone, I can only say that it is not good science.

It is rather the reasoning of a fish, convinced that nothing can live except in water. I am inclined to believe the illustrious British naturalist, therefore, has some greater reasons than those we have as vetbeen permitted to study on which to base his conclusions.

At present I am unable to explain how he At present I am unable to explain how he could otherwise arrive at such a narrow and light deduction.

BY G. M. SEARLE.

New York, Feb. 7.—The article by Mr. Wallace on "Man's Place in the Universe" has attracted a most unusual amount of attention and interest. This, no doubt, is partly due to the unquestioned eminence of the author as a scientific man; but perhaps even more to the conclusion at which he arrives, which seems to himself, and probably to most people, as one materially helping to remove astronomical difficulties in the way of the Christian religion.

This interest is very gratifying to all believers, for it seems to show that a great many people wish to have such difficulties removed, that they really desire to believe. We are a great deal more interested in what we hope than in what we fear to be true. We want to know the one and ignore the other.

The article in question, however, has not really quite the strength or weight which it is supposed to have. It does not rest on any discoveries recently made. The author, though most distinguished in his own department of science, is not a specialist in astronomy, and the real facts he adduces are simply those given in text-books. His main thesis as to the central position of the sun in the universe, so far as it is really warranted by the facts, is one already commonly accepted.

That the universe has a limit, so that a central position is possible, is a fairly legitimate conclusion, obtained from the fact that there are fewer stars than we ought to find of the very faint brilliancy, now made visible by our large telescopes, than there would be if such were not the case, and also from another consideration, it is hardly worth while to explain this matter more thoroughly here. Mr. Wallace has done so very clearly, but in this he, of course, claims to originality.

crops, so as to improve the quality of the See our Windows for Correct Fabrics, Har-lan Bros., Tailors, Sixth and St. Charles

DUG UP A POT OF GOLD.

James Mooney Unearthed \$1,000 While Digging Post Hole.

REPUBLIC SPECIAL.

Owensboro, Ky., March 8.—James Mooney of near Stanhope, Webster County, unearthed \$1.00 in gold while digging post holes on the farm of William Gardiner.

Gardiner and Mooney were working together. Gardiner, with a spade, was digging to where the dirt became hard and Mooney was following with a post-hole digger. Gardiner's attention was attracted by Mooney, who was down on his knees some six holes in the rear. He discovered that his employe had struck a gold mine and was taking \$50 gold pieces from the unfinished post hole by the handful. Upon counting it he found that there was \$1.00.

Mooney pocketed the money and refused to divide with the owner of the land, or even to lend him \$50.

From the position of the money it is supposed that it was burled in a tin or wooden vessel. It is said that a man committed suicide near this spot about the close of the war, and he was supposed to have a lot of money.
